

**Thank you for purchasing
Cardsharp® pocket knife.**

With proper care this unique
product will provide many years
of service.

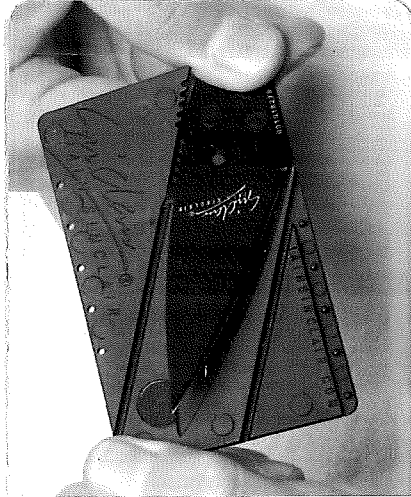

We believe Cardsharp® is the
first real innovation in penknives
since the first folding knife,
which has been around for over
2000 years and is virtually
unchanged from today's Swiss
Army penknife.

Cardsharp® is thinner, lighter
and due to its use of surgical
steel: sharper. Polypropylene has
been selected for the handle as
the polymer's unique molecular
structure allows infinite numbers
of folds through 180° without the
hinge cracking and this feature
is therefore guaranteed for life.

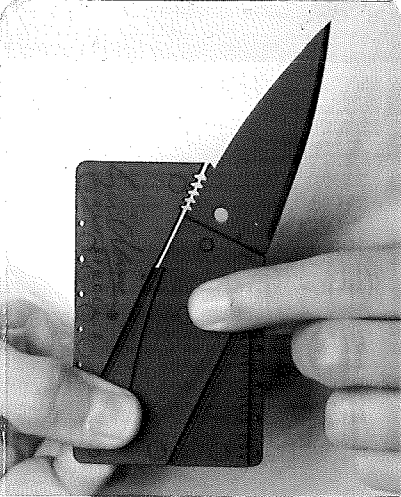

**AS THE MECHANISM IS UNIQUE,
PLEASE FOLLOW INSTRUCTIONS
BEFORE OPENING KNIFE.**

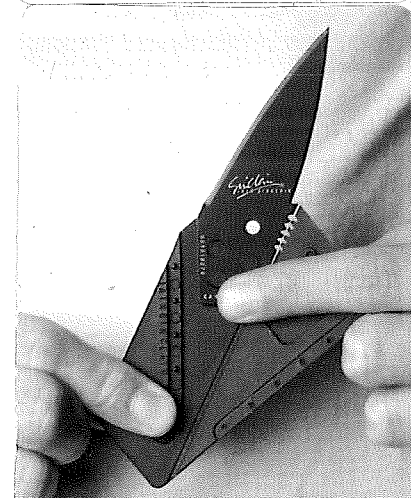

CLOSED MODE.
Green circle segment indicates
blade is locked.

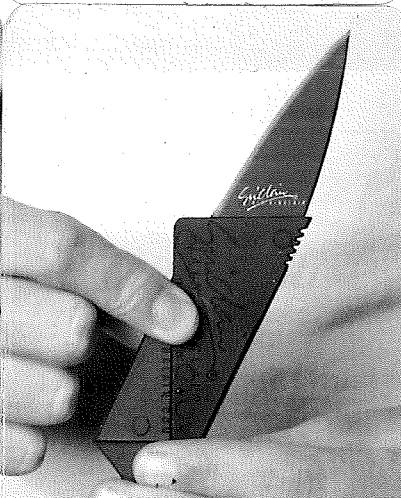

**1) Unlock blade by turning safety
catch with thumb and forefinger
so no green shows. Next bend
blade away from you.**

**2) Continue to fold blade so it
looks like this.**

**3) Now turn knife upside down so
it looks like this and fold small
flap through 180°.**

**4) Finally, fold large flap through
180° and snap home the six small
bosses. Also, ensure the larger
boss fits fully into blade.**
